

Simplify Your ESG Reporting

**Your ESG Software to
Future-Proof Your Reporting**

Your ESG Software to Future-Proof Your Reporting

Supercharge your reporting with an ESG Software. Simplify your data collection process, oversee performance with Disclosure Dashboards, Peer Benchmarking and Goal Setting features, and be able to manage your narratives to create compelling stories and a compliant Sustainability Report that can adapt to the ever-changing ESG requirements.

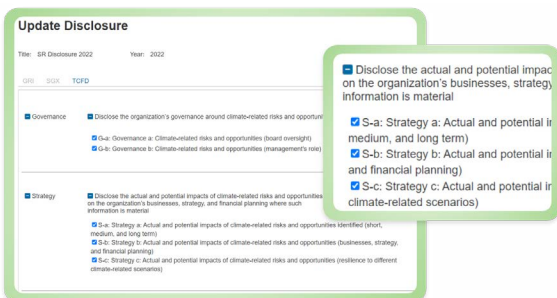

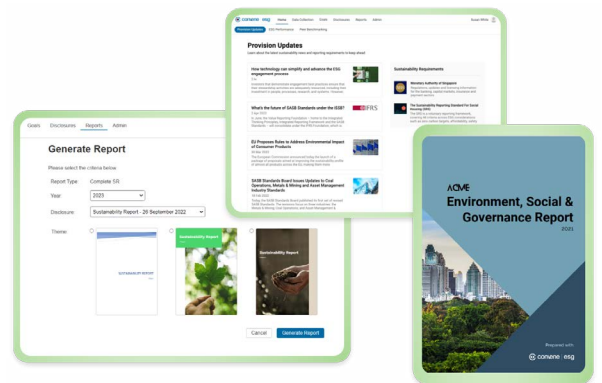

Simplified ESG Journey

The entire journey leading up to report generation is powered by a platform that allows you to fully and efficiently manage ESG data and take control of your narratives and strategies to deliver compelling reports and ultimately attract investors.

Compliant Reports

Your reports are not only guaranteed to be compliant with current mandatory requirements, they are built to continuously adapt to increasingly demanding ESG provisions year after year.

Strong ESG Expertise

Produce an ESG Report adaptive to best practices and aligned with local provision and reporting guidelines with additional guidance from our team of experts.

Reporting has never been easier with a platform.

Streamlined workflow, from start to end

Easily plug in your data once in a single central location and you're free to use and repurpose the same set of data for multiple types of reporting all in one platform. Import of data won't be a problem either, since we'll do the uploading for you.

Export a readily available SR, customise further if you like

A templated Sustainability Report is available for download based on Best-Practice Recommendations from our Team of Experts. Custom-design your reporting template further if you want to add in more metrics & other frameworks, and incorporate your own branding.

Address demanding and evolving requirements

Generate a report that will evolve with ESG requirements so you will never have to worry about compliance. Your quantitative and qualitative narratives can easily adapt to changes as you get provision updates and guidance from within the platform.

Your Board needs to be powered with an ESG Platform.

Maintain oversight and drive strategy

Data being in one space means better governance and oversight of goals, data collection workflows, and benchmarking, among others. This prevents greenwashing and effectively enables the board to prepare for future mandatory internal reviews.

Traceable record of all data

Data is rendered unreliable when there is no tangible source or accountable authority. Monitor and access a clear and consolidated record of all ESG data and updates in one platform, allowing for ownership, easier tracking and auditing.

One secure and resilient data hub

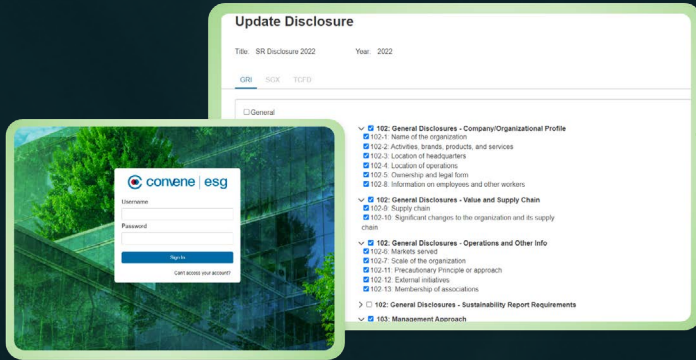

With data continuing to pile up every year, postponing digital data storage only makes reporting more inefficient in the long run. Store years of data in a secure and organised digital repository, with primary and backup data stored in AWS Data Centre.

You'll have full ownership of your ESG data!

DATA OWNERSHIP

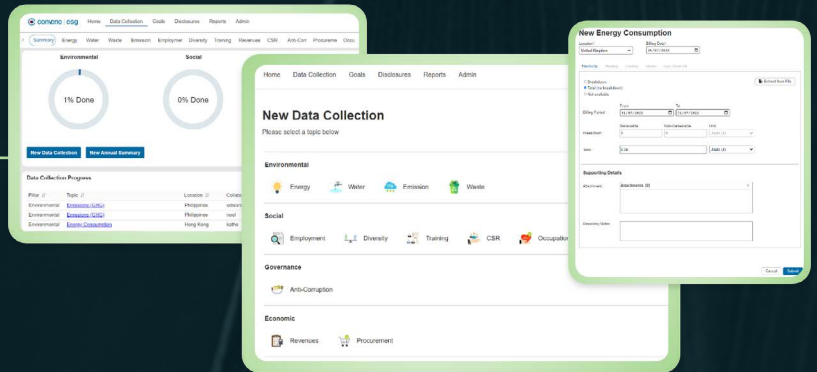

Your Own ESG Reporting Software

Simplify every step of your ESG reporting journey for easier and more efficient report preparation and generation.

Automated Data Workflows and Centralised Repository

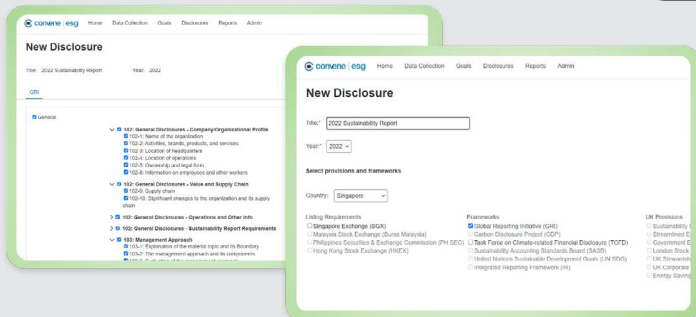

Consolidate years worth of data via automated collection workflows, and store all info in one location - everything's intact to ensure accuracy and completion.

FULL COMPLIANCE

Get Best Practice Recommendations For a Fully Compliant Report

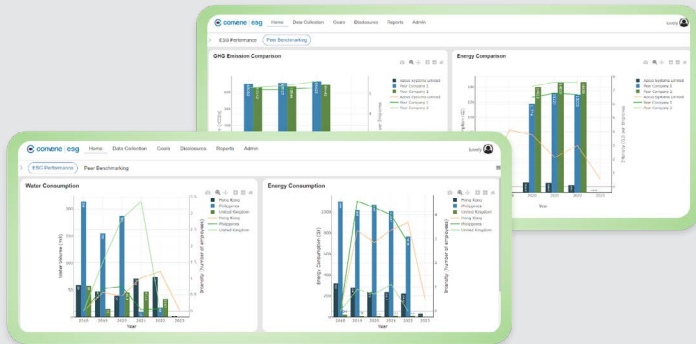

Get recommendations from experts in the field and define the scope of your report as you prepare using flexible reporting templates, guaranteeing full compliance with mandatory requirements.

OVERSIGHT & STRATEGIES

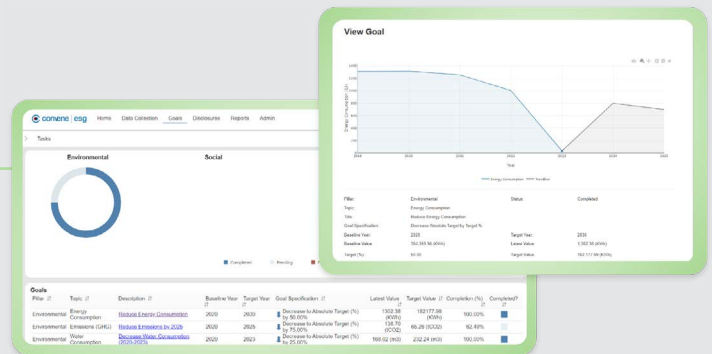

Dashboards to Track and Monitor Performances

Oversee everything - track goals, benchmark against peers, monitor the reporting process, do mandatory internal reviews - to properly manage your narratives for ESG investors and stay ahead of the competition.

Drive your ESG Strategies through Goal Setting & Monitoring

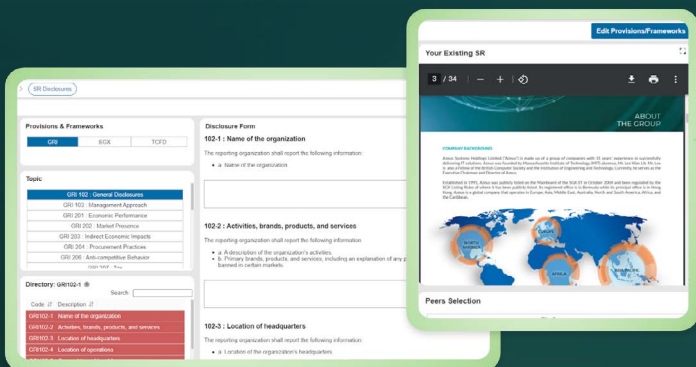

Having full visibility allows you to set your ESG strategies in motion and attain your goals with full control and ownership.

FUTURE-PROOF REPORTING

Get support from our Team of Experts and Strategic Partnerships

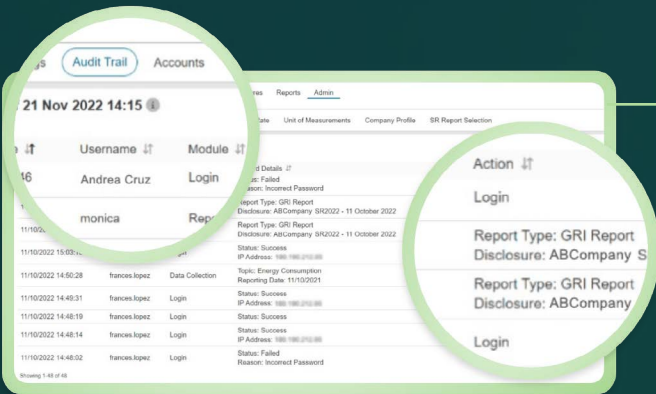

Make the most out of our established relationships with dedicated ESG Experts and Partners through consultations, assurance, and integrations.

FUTURE-PROOF REPORTING

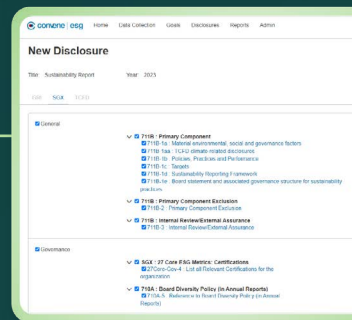

Reinforce Your Data Governance

Strengthen your overall data governance with greater data security, traceability, and accountability. Access ESG data history and audit trail all in one platform.

Produce a Report that Evolves with the Requirements

Generate reports with customisable templates that allow for input of qualitative narratives. The format is guaranteed to adapt with changes in ESG requirements year after year.
